

Safety Staffing

Proceed with confidence.

THE FLEXIBLE APPROACH TO PROFESSIONAL STAFFING

Whether you need top-caliber safety professionals to manage safety on short- or long-duration projects, want to supplement your own safety team, or need specialized expertise for a major outage, we respond quickly with experienced individuals who understand your environment.

EXTRA HELP WHEN YOU NEED IT

Our Safety Staffing services give you remarkable flexibility in meeting your needs. Thanks to full-time recruiting and our relationships with top safety professionals nationwide, we have the resources and depth to respond to assignments quickly. That means you can be confident that finding the right person won't delay your project. Our network of professionals also allows us to assign multiple safety advisors to your project when needed.

CONTROLLING COSTS AND RISKS

Relying on our Safety Staffing services frees you from the challenge of finding and hiring safety professionals for special projects. Because our safety advisors are our employees, we handle all compensation, benefits and taxes. Just as important, you don't have to worry about downtime if one of our safety advisors becomes unavailable because of illness or another reason, because we provide fast access to a replacement.

EXPERIENCED PROFESSIONALS

Our safety advisors work directly with your team to integrate safety from the initial hazard assessment planning stages to continuous field representation through safe project completion. They understand that safety, quality and productivity work hand-in-hand, and are experienced working within the frameworks such as OCIPs and large construction projects. We meet your specialized needs by providing professionals with extensive experience in many areas, among them:

EXPERTISE FOR SPECIAL PROJECTS

When you need additional safety staff for project-oriented environments such as shutdowns, turnarounds, or other major outages, our professionals bring the expertise to provide safety oversight on even the tightest timelines. Safety Management Group will identify and provide the professionals who have the ideal experience and background to satisfy the unique needs of your project.

STAFFING EXPERIENCE

Safety Management Group provides experienced project safety professionals to staff and manage site safety on your project or to supplement your team when additional safety support and representation is needed. Companies that utilize our safety consultant contracting and staffing teams include Owners, General Contractors, Construction Managers, Insurance Brokers and Sub-contractors.

Our team is experienced in all project-oriented environments including outages, shutdowns, turnarounds, new construction, expansions, additions, Owner Controlled Insurance Programs (OCIP) and large scale industrial and demolition projects.

Our experience ranges from aviation to wind power, healthcare, steel mills, refineries, hospitality, pharmaceutical, sports facilities, automotive, power plants, and more. These projects range from less than \$1 million to more than \$1 billion.
